Commanders

The ASAP is a commander's program designed to monitor and improve the personnel readiness of the unit's Soldiers. Your program must be designed for a garrison and a deployed environment. Just like you ensure combat readiness of vehicles and weapon systems by frequent, recurring PMCS performed to standards, your substance abuse program helps to ensure the combat readiness of your most important combat system - your Soldiers.

The ASAP is a PMCS of your Soldiers.

Below are the resources necessary to develop, implement, and execute your substance abuse program.

Commander's Top Ten Guide

The Commander is vital to the successful operation of the Army Substance Abuse Program (ASAP). The Commander's Top 10 Guide is an excellent resource to assist Commanders in establishing and maintaining a successful ASAP Program.

ASAP Guidance for Deployed Commanders

The ASAP Guidance for Deployed Commanders is posted in AKO. This link will force you to log into AKO; you may have to click the link again to view or download the material. AR 600-85 requires commanders to maintain their substance abuse programs to the maximum extent practical while deployed. All units (company or larger) need to mobilize and deploy with at least two (2) certified UPLs and 100% drug testing supplies (random testing and other testing contingencies).

Deployed Units

The requirement to watch out for your Soldiers' welfare with regard to substance abuse does not stop when your unit deployed. We are an Expeditionary Army and units serving in deployed areas face unique challenges when it comes to the execution of the unit level substance abuse program. Go here for specific guidance with your deployed program.

Litigation Packet/Commander's Packet**Commanders/UPL Handbook**

This manual serves as a commander's guide, a UPL handbook, and the student notes for the Unit Prevention Leader Certification Training Program (UPLCTP).

Commander FAQ

Go here to see questions that are frequently asked by commanders. You can also [submit your questions](#) to the ACSAP.

Deployed Drug Testing Results

This tool allows the Commander or his representative to check if any drug testing results have been posted in the last 120 days based on the unit identification code (UIC).

Counseling Resources

Soldiers serving in deployed areas face unique challenges, counseling resources can be accessed by seeing your unit chaplain or medical support. Deployed commanders contact biochem@conus.army.mil for information.

Deployed Units

The requirement to watch out for your Soldiers' welfare with regard to substance abuse does not stop when your unit deployed. We are an Expeditionary Army and units serving in deployed areas face unique challenges when it comes to the execution of the unit level substance abuse program.

*AKO Page for Deployed Commanders and UPLs

Operational sensitive information is posted in AKO. A link to the material in AKO will force you to log in; you may have to click the link again to view or download the material.

*ASAP Guidance for Deployed Commanders

The ASAP Guidance for Deployed Commanders is posted in AKO. This link will force you to log into AKO; you may have to click the link again to view or download the material. AR 600-85 requires commanders to maintain their substance abuse programs to the maximum extent practical while deployed. **All units (company or larger) need to mobilize and deploy with at least two (2) certified UPLs and 100% drug testing supplies (random testing and other testing contingencies).**

*QC/Packaging/Shipping Specimens (CENTCOM) (Previous DA Mandated UPL Retraining)

DA Mandate for UPL Retraining has expired. Training material via this link is still available for local use by deployed commanders and UPLs. CDRs/UPLs need to follow this QC/Packaging/Shipping procedure to ensure all specimens are testable.

*UPL Certification & Recertification (for Deployed UPLs ONLY)

to comply with AR 600-85 and conduct military unit collections.

1: Registration , 2: Education , 3: Verification (CDR) 4: Examination

*ACSAP Registration for USPS MRS Mail Labels (Procedure)

(DO NOT register if you had ACSAP Portal username and password).

Only UPLs serving units currently deployed in ARCENT/CENTCOM AO may use the USPS MRS Mail Labels to ship specimens to Tripler Forensic Drug Testing Laboratory. UPL certified online via ACSAP website must use the existing ACSAP Portal username and password. Other UPLs **MUST register with ACSAP Portal** to use the USPS MRS MAIL Labels.

*Tracking Specimen Package at USPS

Check package status by MRS Label Barcode. Go to www.usps.com >click **Track & Confirm**> enter **barcode**> click **Find**.

*Deployed Drug Testing Results

This tool allows the Commander or his representative to check if any drug testing results have been posted in the last 120 days based on the unit identification code (UIC). Contact BAC Manager for actual result reports.

*Tutorials

Tutorials specifically for Deployed UPLs and Base Area Code Managers. Access to these files requires AKO Log in.

*Command & Regulatory Guidance

Access to these files requires AKO Log in.

*Base Area Codes (BAC) and Managers (BACM)

All units MUST contact the BAC Manager to confirm BAC for testing, results reporting procedure, and other support for unit's ASAP. Incorrect use of BAC may cause test results to be un-reportable.

*MRO Training & Certification (MEDCOM)

MEDCOM contacts and AKO address for MEDCOM MRO Training & Certification.

Drug Testing Report

This tool is to be used by deployed Commanders or their duly appointed representative acting on the Commander's behalf who submitted urinalysis specimens using a CT base area code. This tool allows you to check if any drug testing results have been posted by the Forensic Toxicology Drug Testing Lab (FTDTL) over the last 120 days.

You must enter the 6 character Unit Identification Code (UIC) EXACTLY as it appears on the Unit Ledger for that collection [i.e., 0 (zero) versus O (the letter "O")]. Your UPL should have a copy of the Unit Ledger.

Enter UIC: [Run Report](#)

(Note: Click "Run Report" button to connect to Drug Testing Report page at ACSAP website)

Base Area Codes (BAC) and Managers (BACM)

All units **MUST** contact the BAC Manager to confirm BAC for testing, results reporting procedure, and other support for unit's ASAP. Incorrect use of BAC may cause test results to be un-reportable.

DRUG INFORMATION**AR 600-85, para 4-2: ...**

Article 112a, UCMJ, prohibits the unlawful use of

* opium, heroin, cocaine, amphetamine, lysergic acid diethylamide (LSD), methamphetamine, phencyclidine, barbituric acid, marijuana, and any compound or derivative of any such substance.

* substance prescribed by the President or listed in Schedules I through V of section 202 of the Controlled Substances Act (21 USC 812).

AR 600-85 prohibits Soldiers from using:

* Hemp or products containing Hemp oil.

* following substances for the purpose of inducing excitement, intoxication, or stupefaction of the central nervous system.

(1) Controlled substance analogues (designer drugs).

(2) Chemicals, propellants, or inhalants (huffing).

(3) Dietary supplements that are banned by the United States Food and Drug Administration.

(4) Prescription or over-the-counter drugs and medications (when used in a manner contrary to their intended medical purpose or in excess of the prescribed dosage).

(5) Naturally occurring substances (to include but not limited to Salvia Divinorum, Jimson Weed, and so forth).

This provision is not intended to prohibit the otherwise lawful use of alcoholic beverages.
